Limetree Bay: On 8/14/19, APB sent a letter to Limetree informing them of 2 discrepancies that surfaced when we compared the **PAL** application and the NOx emission reduction terms of the signed Consent Decree (CD). Emissions associated with Limetree's recent shut down of 6 emission units (pursuant to CD) must be subtracted from the PALs limits for NOx (1080 tpy) as well as for all other pollutants. Also, the NOx emission factor used for calculating emissions from 11 small heaters was not correctly selected from the emission factors listed in the PAL application. Recalculation using the correct emission factor shows that the NOx PAL needs to be reduced further by 153 tpy. As a result, our proposed NOx PAL for Limetree will be reduced by 1233 tpy. On 8/16/19, APB sent the revised draft PAL permit and the EJ writeup to OGC and OAQPS for review/comment by 8/23/19. A call is tentatively scheduled on 8/26/19 with HQ to go over any significant comments that warrant a discussion with the Region.

A conference call was held on 8/20/19 with Limetree to discuss APB's 7/18 response to Limetree's SO2 monitoring proposal. ARD will discuss the results of the call at the upcoming RA briefing.
